

Organiser's comments

Well, it didn't turn out quite as I hoped! Pete Ward, Andy Monnro & Ivan Teed reported that control 11 on the Blue course was in the wrong area completely and unfindable. I investigated, and there it was – in exactly the right area. The only answer that we can come up with is that somebody with a grudge – possibly an ornithologist, as birds are nesting at the moment – just pulled it out and flung it into the adjacent wooded part. An orienteer must have come across it by sheer luck and 'replanted' it.

All three competitors have had their results re-instated. I hope this gives Pete Ward some incentive as I know he is keen to be in there with a good final points score.

The registration tent collapsed in a freak gust causing Sue Hartley a moment of panic inside. In the end, it was a quick transfer of the downloading to Alan Richard's Volvo!

Thanks to Alan R, Alan M, Sue, Rosemary, Laura and Rachel for a job well done.
