

Planner / Organiser's Comments

Many thanks for so many of you coming to support the event today. From the favourable comments I received, the good weather and runability of the area seems to have made up for the steepness of the courses.

Apologies to more than half of the competitors on the yellow course whose day was ruined by mindless vandals who moved controls 6 (down a ditch) and 7 (behind a tree on the adjacent path junction). Rather than voiding the course in its entirety, we have decided to remove the offending legs (5-6, 6-7 and 7-8). We considered this to be the fairest way of redeeming the situation - thankfully the use of SI enables us to do such things.

Pete
