

League 8 – Mallards Pike – 12 May 2012

Two problems occurred on the Blue course. The results have been amended as follows :

Control 53 wrongly placed – the two legs 44-53 and 53-46 have been removed from the results.

Control 51 was vandalised – the control has simply been removed from the checking process, i.e. your overall run time is the same as shown on your splits print-out. The reason for this is that the site for the control was obvious and runners would have lost little time, if any, because of the missing control.

The voiding of legs has had effect on RouteGadget. You can still put in your course but the animation is a bit up the creek – some legs are very slow and some very quick. All part of the enjoyment!

Any problems, contact the organiser ☺
